

Hach PunchOut Catalog

Purchase with confidence

The Hach® PunchOut Catalog provides a direct link between your procurement system and our inventory, including availability, pricing and approval.

Connect to Your E-Procurement System

The solution you require to purchase items directly from Hach's online catalog in your procurement system. Ease the buying process when you order directly from Hach.

Simplify the purchasing process: submit orders and receive responses faster; quickly find products you order; receive instant, accurate pricing; link directly to Hach.

Procurement PunchOut Standard Protocol

Your procurement application creates a session on Hach's Web site and then retrieves the content of the shopping cart for you to begin the purchasing requisition process.

PunchOut Features

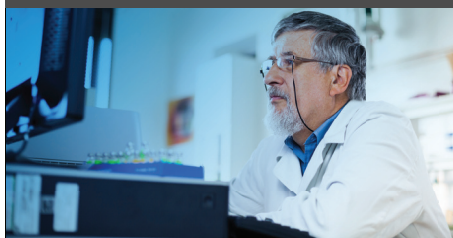

- Link directly to Hach's PunchOut catalog in your procurement system.
- Add items to cart using Hach's PunchOut catalog.
- Create the requisition in your procurement system.

PunchOut Benefits

- Approval process resides within your ERP.
- Use your own approval hierarchies and approval amounts established in your procurement systems.
- Enforce three-way match with your ERP Purchasing module.
- Code expenses properly before routing to AP.

Contact your Hach account manager to get started with PunchOut today!
